## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

### DETAILED ACTION

1. This application is acknowledged as a Continuation of S.N. 09/803,933, filed 3/13/01.
2. The numbering of claims is not in accordance with 37 CFR 1.126 which requires they must be numbered consecutively. Misnumbered claims 4-41 have been renumbered 3-40. Thus, claims 1-40 are currently pending.
3. The IDS filed 11/21/03 has been considered as indicated. References AY, AZ and BZ were not considered since these documents were not considered in the parent application for failure to satisfy the requirements of 37 CFR 1.98. Note that several documents were lined through because of multiple citation.
4. Applicant is advised that should claim 37 be found allowable, claim 38 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).
5. Claims 6, 7 and 19-35 are objected to because of the following informalities:
  - A. As per claims 6 and 23, the claims are confusing as recited ("is configured for transmits"). The examiner suggests rewriting the claims as --is configured to transmit--.
  - B. As per claim 19, at line 7 insert --unit-- after "main".
  - C. All claims depending from an objected base claim are also objected to as containing the same deficiencies.

Art Unit: 3661

6. Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A. As per claim 5, "the respective power-supply source" lacks antecedence. Note this limitation is found in claim 4.

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 37 and 38 are rejected under 35 U.S.C. 102(b) as being anticipated by Wroblewski et al. (4,736,367).

A. As per claims 37 and 38, Wroblewski discloses a system for data transmission for a vehicle as shown in Fig. 1. The system includes a main unit (20) designed to transmit and receive signals from a plurality of modules associated with a sensor (14) wherein the sensor outputs a signal upon detection of a predetermined condition (col. 1, lines 12-15; col. 2, lines 39-44). As discussed in the Abstract, the sensor modules are configured to respond to signals from the main unit and to transmit signals back to the main unit during repetitive and sequential time slots.

9. Claims 1-4, 8-18, 36 and 40 are allowed.

10. Claims 5-7 and 19-35 would be allowable if rewritten or amended to overcome the objection(s)/rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Art Unit: 3661

11. Claim 39 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael J. Zanelli whose telephone number is (703) 305-9756. The examiner can normally be reached on Monday-Thursday 5:30 AM - 4:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas G. Black can be reached on (703) 305-8233. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
